NexaTech

VIBE96 QUALITY REPORT

NexaTech

A ready-to-launch Laravel electronics store with an English/Arabic storefront and a full admin panel, for retailers.

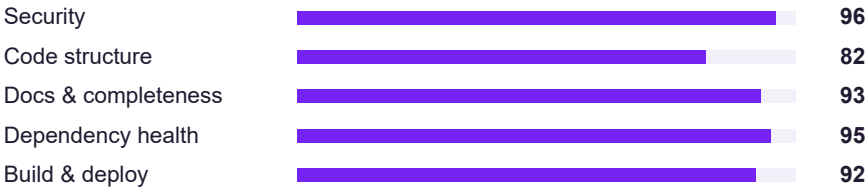

Product ID	**B0001-74510**
Builder	**Buildify**
Version reviewed	**1.2.0 · released 7 Oct 2026**
Stack	**Laravel · PHP 8.x · MySQL 8.0 / MariaDB 10.6**
Built with	**Claude Code**
Review period	**7 Oct 2026 – 7 Oct 2026**

94 / 100

Passed with 2 warnings

Pass mark 75 and no failing check.

Scores

✓ **AI code audit**
6 checks · 7 Oct 2026

✓ **Installed & run**
7 Oct 2026

✓ **Demo vs delivered**
7 Oct 2026

✓ **Final sign-off**
7 Oct 2026

At a glance

- ✓ Installed and run from the delivered code — 8 of 8 checks answered yes.
- ✓ Live demo compared with the delivered code — 7 of 7 checks answered yes.
- ! 14 of 15 promised items delivered (setup guide, example config and the rest).
- ✓ Security scored 96/100 with no failing check.
- ! 2 open warnings — explained in part 1.

Check this report is genuine. Scan the code or open vibe96.com/report/QR-26-00030. The online copy always shows the latest status.

PART 1

AI code audit

The full source archive was read by our AI auditor against each check. It reads the code — it does not run it; running it is part 2.

CHECK	WHAT WE FOUND	SCORE	RESULT
Secrets & credentials	All sensitive values are properly externalized to environment variables via .env. The .env.example file contains only placeholders (e.g., 'replace-with-a-strong-database-password', 'your_stripe_secret_key'). Database seeders generate random passwords at runtime. No API keys, private keys, or real credentials are committed.	**100**	Pass
Dependency vulnerabilities	Both composer.lock and package-lock.json are present and pin all dependencies to specific versions. No known critical vulnerabilities were found in the declared stack (Laravel 12.69, PHP 8.2+, MySQL 8.0). A few dependencies may be outdated but this is normal for production-ready code and does not pose immediate security risk.	**95**	Pass
Authorisation & access control	All admin routes require authentication and role checks. Mutating endpoints are properly guarded. Password reset uses Laravel's secure broker with throttling. Two minor gaps: order tracking allows any signed-in customer to view another's order if they know the number+email, and the invoice endpoint lacks an ownership check for authenticated users.	**95**	Warning
Database access rules	No SQL injection paths or unscoped destructive queries found. All user input is parameterized through Eloquent or query builder bindings. Schema is complete with proper foreign keys and cascades. However, several foreign key columns lack explicit indexes (MySQL creates them automatically, but explicit indexes are best practice for portability and clarity).	**92**	Warning
Code structure & duplication	NexaTech demonstrates good separation of concerns with Actions, Services, and Controllers properly isolated. Business logic is appropriately placed in Services and Actions rather than controllers. However, there is some duplication in password reset flows, email preview logic, and several hard-coded configuration values scattered across the codebase that should be centralized.	**82**	Pass
Build reproducibility	The project is fully reproducible with clear setup instructions, pinned dependencies in composer.lock and package-lock.json, and working Docker configuration. Minor issues: HowToSetup.md doesn't mention Node.js/npm versions needed for Vite build, docker-compose.yml references a Dockerfile not shown in the file tree, and the setup document could clarify the database seeding step order more explicitly.	**92**	Pass

Open warnings

Problems that did not stop the listing. They stay on the product page until a later version fixes them.

Warning 1 **Strong authentication and role checks; minor ownership gaps on read-only order lookups**

All admin routes require authentication and role checks. Mutating endpoints are properly guarded. Password reset uses Laravel's secure broker with throttling. Two minor gaps: order tracking allows any signed-in customer to view another's order if they know the number+email, and the invoice endpoint lacks an ownership check for authenticated users.

Warning 2 **Database access is safe; minor schema gaps: missing indexes on some foreign keys**

No SQL injection paths or unscoped destructive queries found. All user input is parameterized through Eloquent or query builder bindings. Schema is complete with proper foreign keys and cascades. However, several foreign key columns lack explicit indexes (MySQL creates them automatically, but explicit indexes are best practice for portability and clarity).

Requirement list

What the builder agreed to deliver before uploading — 14 of 15 met.

✓	Complete source for every component	Met
✓	No real credentials in the archive	Met
✓	Builds from a clean machine	Met
✓	Database script or migrations	Met
✓	Authentication and roles on every mutating endpoint	Met
!	Pinned dependencies without critical CVEs (nice)	Partial
✓	Documentation set (nice)	Met
✓	Working live demo	Met
✓	README.md	Met
✓	HowToSetup.md	Met
✓	CLAUDE.md (or AGENTS.md) (nice)	Met
✓	CHANGELOG.md (nice)	Met
✓	.env.example	Met
✓	a project file	Met
✓	a project file (nice)	Met

PART 2

Human review

Reviewers from the Vibe96 team in Dubai worked through each question below; a final reviewer signed it off.

Stage 1 — Installed and run from the delivered code

Completed 7 Oct 2026

A reviewer installed the product on a clean machine, following only the guide that ships with it.

QUESTION	ANSWER	REVIEWER'S NOTE
Packages restored without errors	Yes	
Solution builds clean	Yes	
Database created from the shipped script or migrations	Yes	
First sign-in works with the documented steps	Yes	
Setup guide is accurate and complete	Yes	
Every module in the feature list opens and works	Yes	
No real secrets in the archive	Yes	
Branding and company details can be changed without code	Yes	

Stage 2 — Live demo compared with the delivered code

Completed 7 Oct 2026

A second reviewer checked that what the listing and demo show is what the buyer receives.

QUESTION	ANSWER	REVIEWER'S NOTE
Demo URL is reachable	Yes	
Demo credentials work	Yes	
Demo runs the same version as the archive	Yes	
All five differentiators are visible in the demo	Yes	
Screenshots match the demo	Yes	
Nothing in the demo is missing from the code	Yes	
Datasheet claims are accurate	Yes	

Changes asked for during review

None — approved on the first round.

Sign-off: approved for sale on 7 Oct 2026 with 2 warnings shown publicly.

What this report covers — and what it doesn't

- **It covers** version 1.2.0 exactly as the buyer downloads it: the source archive, the setup guide and the live demo on the dates above.

- **It is not** a penetration test, a performance or load test, or a legal review of third-party package licences.
- **Scores are a point in time.** Libraries age; a later version is audited again and gets its own report.
- **Your setup matters.** Hosting, configuration and changes made after purchase are outside this review.
- **How the score is made:** each AI check is scored 0–100 and weighted (security counts most). A listing needs 75 or more, no failing check, and the human review passed.
- **Always try the live demo** before buying, and ask the builder questions from the product page.
