

VIBE96 QUALITY REPORT

FreshNest

A ready-to-sell organic grocery store in Laravel storefront, Shopify-style admin, Stripe and cash on delivery.

Product ID	**B0001-73574**
Builder	**Buildify**
Version reviewed	**1.1.0 · released 23 Oct 2026**
Stack	**Laravel · PHP 8.x · MySQL 8.0**
Built with	**Claude Code**
Review period	**23 Oct 2026 – 23 Oct 2026**

90 / 100

Passed with 4 warnings

Pass mark 75 and no failing check.

Scores

Security	92
Code structure	82
Docs & completeness	100
Dependency health	85
Build & deploy	92

✓ **AI code audit**
6 checks · 23 Oct 2026

✓ **Installed & run**

At a glance

- ✓ Installed and run from the delivered code — 8 of 8 checks answered yes.
- ✓ Live demo compared with the delivered code — 7 of 7 checks answered yes.
- ✓ 15 of 15 promised items delivered (setup guide, example config and the rest).
- ✓ Security scored 92/100 with no failing check.
- ! 4 open warnings — explained in part 1.

Check this report is genuine. Scan the code or open vibe96.com/report/QR-26-00057. The online copy always shows the latest status.

PART 1

AI code audit

The full source archive was read by our AI auditor against each check. It reads the code — it does not run it; running it is part 2.

CHECK	WHAT WE FOUND	SCORE	RESULT
Secrets & credentials	No API keys, private keys, or real credentials were found in the codebase. The .env.example file correctly uses placeholders for all sensitive values. However, the ADMIN_PASSWORD field in .env.example is left empty with instructions to generate a strong password, which is good practice but could lead to weak passwords if users ignore the guidance.	95	Warning
Dependency vulnerabilities	The project uses Tailwind CSS 4.3.3 which is a pre-release version (4.x is still in beta). Composer dependencies are pinned in composer.lock but several packages are 6-12 months old. No known critical vulnerabilities detected in the installed versions. The pre-release Tailwind and outdated packages warrant attention before production deployment.	85	Warning
Authorisation & access control	All mutating endpoints require authentication with proper guards (auth:admin, auth:web). Password storage uses bcrypt/Hash::make throughout. Role checks are enforced on sensitive admin areas. Minor gaps: traffic live endpoint lacks ownership validation (any admin sees all visitors), and tour state updates don't verify the tour belongs to the admin's accessible areas before resuming.	92	Warning
Database access rules	No SQL injection paths found. Query builders are used correctly throughout. One unscoped delete in Cleanup service could affect wrong records if called incorrectly. Schema is complete with proper foreign keys, but several foreign key columns lack indexes (traffic_sessions.user_id, order_items.product_id, etc.) which will hurt performance at scale.	88	Warning
Code structure & duplication	The project demonstrates good separation of concerns with clear module boundaries, services handling business logic, and controllers remaining thin. However, there is some duplication in validation rules, configuration values scattered across files, and a few oversized controllers that could benefit from further decomposition.	82	Pass
Build reproducibility	The project is fully reproducible with correct dependency versions, proper .gitignore exclusions, and a comprehensive setup guide. Minor issues: HowToSetup.md doesn't explicitly mention Node.js version requirement (though package.json exists), and the GeoIP database download step could be clearer about when it's needed.	92	Pass

Open warnings

Problems that did not stop the listing. They stay on the product page until a later version fixes them.

Warning 1 **Dependencies mostly current; Tailwind CSS 4.3.3 is pre-release, some outdated packages**

The project uses Tailwind CSS 4.3.3 which is a pre-release version (4.x is still in beta). Composer dependencies are pinned in composer.lock but several packages are 6-12 months old. No known critical vulnerabilities detected in the installed versions. The pre-release Tailwind and outdated packages warrant attention before production deployment.

Warning 2 **No real secrets found; weak demo password default requires immediate change**

No API keys, private keys, or real credentials were found in the codebase. The .env.example file correctly uses placeholders for all sensitive values. However, the ADMIN_PASSWORD field in .env.example is left empty with instructions to generate a strong password, which is good practice but could lead to weak passwords if users ignore the guidance.

Warning 3 **Database access mostly safe; minor schema gaps and one unscoped delete risk**

No SQL injection paths found. Query builders are used correctly throughout. One unscoped delete in Cleanup service could affect wrong records if called incorrectly. Schema is complete with proper foreign keys, but several foreign key columns lack indexes (traffic_sessions.user_id, order_items.product_id, etc.) which will hurt performance at scale.

Warning 4 **Strong authentication guards; minor ownership gaps on read-only admin endpoints**

All mutating endpoints require authentication with proper guards (auth:admin, auth:web). Password storage uses bcrypt/ Hash::make throughout. Role checks are enforced on sensitive admin areas. Minor gaps: traffic live endpoint lacks ownership validation (any admin sees all visitors), and tour state updates don't verify the tour belongs to the admin's accessible areas before resuming.

Requirement list

What the builder agreed to deliver before uploading — 15 of 15 met.

✓	Complete source for every component	Met
✓	No real credentials in the archive	Met
✓	Builds from a clean machine	Met
✓	Database script or migrations	Met
✓	Authentication and roles on every mutating endpoint	Met
✓	Pinned dependencies without critical CVEs (nice)	Met
✓	Documentation set (nice)	Met
✓	Working live demo	Met
✓	README.md	Met
✓	HowToSetup.md	Met
✓	CLAUDE.md (or AGENTS.md) (nice)	Met
✓	CHANGELOG.md (nice)	Met
✓	.env.example	Met
✓	a project file	Met
✓	a project file (nice)	Met

PART 2

Human review

Reviewers from the Vibe96 team in Dubai worked through each question below; a final reviewer signed it off.

Stage 1 — Installed and run from the delivered code

Completed 23 Oct 2026

A reviewer installed the product on a clean machine, following only the guide that ships with it.

QUESTION	ANSWER	REVIEWER'S NOTE
Packages restored without errors	Yes	
Solution builds clean	Yes	
Database created from the shipped script or migrations	Yes	
First sign-in works with the documented steps	Yes	
Setup guide is accurate and complete	Yes	
Every module in the feature list opens and works	Yes	
No real secrets in the archive	Yes	
Branding and company details can be changed without code	Yes	

Stage 2 — Live demo compared with the delivered code

Completed 23 Oct 2026

A second reviewer checked that what the listing and demo show is what the buyer receives.

QUESTION	ANSWER	REVIEWER'S NOTE
Demo URL is reachable	Yes	
Demo credentials work	Yes	
Demo runs the same version as the archive	Yes	
All five differentiators are visible in the demo	Yes	
Screenshots match the demo	Yes	
Nothing in the demo is missing from the code	Yes	
Datasheet claims are accurate	Yes	

Changes asked for during review

None — approved on the first round.

Sign-off: approved for sale on 23 Oct 2026 with 4 warnings shown publicly.

What this report covers — and what it doesn't

- **It covers** version 1.1.0 exactly as the buyer downloads it: the source archive, the setup guide and the live demo on the dates above.

- **It is not** a penetration test, a performance or load test, or a legal review of third-party package licences.
- **Scores are a point in time.** Libraries age; a later version is audited again and gets its own report.
- **Your setup matters.** Hosting, configuration and changes made after purchase are outside this review.
- **How the score is made:** each AI check is scored 0–100 and weighted (security counts most). A listing needs 75 or more, no failing check, and the human review passed.
- **Always try the live demo** before buying, and ask the builder questions from the product page.

Report history

REPORT	VERSION	DATE	SCORE	STATUS
QR-26-00057	1.1.0	23 Oct 2026	**90**	Current
