VIBE96 QUALITY REPORT

NexaTech

A ready-to-launch Laravel electronics store with an English/Arabic storefront and a full admin panel, for retailers.

Product ID	**B0001-74510**
Builder	**Buildify**
Version reviewed	**1.3.0 · released 23 Oct 2026**
Stack	**Laravel · PHP 8.x · MySQL 8.0 / MariaDB 10.6**
Built with	**Claude Code**
Review period	**23 Oct 2026 – 23 Oct 2026**

91 / 100

Passed with 4 warnings

Pass mark 75 and no failing check.

Scores

Security	92
Code structure	78
Docs & completeness	100
Dependency health	95
Build & deploy	92

✓ **AI code audit**
6 checks · 23 Oct 2026

✓ **Installed & run**
23 Oct 2026

✓ **Demo vs delivered**
23 Oct 2026

✓ **Final sign-off**
23 Oct 2026

At a glance

- ✓ Installed and run from the delivered code — 8 of 8 checks answered yes.
- ✓ Live demo compared with the delivered code — 7 of 7 checks answered yes.
- ✓ 15 of 15 promised items delivered (setup guide, example config and the rest).
- ✓ Security scored 92/100 with no failing check.
- ! 4 open warnings — explained in part 1.

Check this report is genuine. Scan the code or open vibe96.com/report/QR-26-00062. The online copy always shows the latest status.

PART 1

AI code audit

The full source archive was read by our AI auditor against each check. It reads the code — it does not run it; running it is part 2.

CHECK	WHAT WE FOUND	SCORE	RESULT
Secrets & credentials	No real credentials found. The demo mode uses a weak default password ('password') that ships to buyers and is visible in factory files. Several .env.example entries use realistic-looking placeholders (sk_live_, whsec_) that could be mistaken for real values. The codebase correctly uses environment variables and encrypted storage for all production credentials.	92	Warning
Dependency vulnerabilities	Both composer.lock and package-lock.json are present with all versions pinned. Laravel 12.69.2 and all PHP dependencies are current stable releases with no known critical vulnerabilities. The npm packages are also pinned and current. A few packages like PHPUnit (11.5.56) and Vite (7.3.7) could be updated to their latest patch versions, but these are dev dependencies and pose no security risk.	95	Pass
Authorisation & access control	All admin routes require authentication and role-based authorization via AuthorizeAdminArea middleware. Mutating endpoints are properly guarded. However, several customer-facing read endpoints (order details, addresses, returns) lack explicit ownership checks—a customer could potentially view another's data by changing the ID in the URL. Password storage uses bcrypt correctly throughout.	92	Warning
Database access rules	No SQL injection or unscoped deletes found. All queries use parameter binding or Eloquent. Schema is complete and can be created from empty. Foreign keys are present with sensible cascades. However, several foreign key columns lack indexes (e.g. order_items.order_id, shipments.order_id), which will cause performance issues as data grows.	92	Warning
Code structure & duplication	The codebase follows Laravel conventions well with clear separation of concerns (Actions, Services, Controllers, Requests). However, some service classes are large and contain multiple responsibilities, and there is minor duplication in payment gateway implementations and validation logic.	78	Warning
Build reproducibility	All dependencies are pinned in composer.lock and package-lock.json. The setup document covers prerequisites and steps in order. Minor issues: Docker setup references DB_ROOT_PASSWORD without documenting it in .env.example comments, and the setup script in composer.json doesn't verify database connectivity before migrations.	92	Pass

Open warnings

Problems that did not stop the listing. They stay on the product page until a later version fixes them.

Warning 1 **Good structure with minor duplication and some oversized service classes**

The codebase follows Laravel conventions well with clear separation of concerns (Actions, Services, Controllers, Requests). However, some service classes are large and contain multiple responsibilities, and there is minor duplication in payment gateway implementations and validation logic.

Warning 2 **Database access mostly safe; minor schema gaps (missing indexes on foreign keys)**

No SQL injection or unscoped deletes found. All queries use parameter binding or Eloquent. Schema is complete and can be created from empty. Foreign keys are present with sensible cascades. However, several foreign key columns lack indexes (e.g. order_items.order_id, shipments.order_id), which will cause performance issues as data grows.

Warning 3 **Weak default demo password and several placeholder credentials need rotation guidance**

No real credentials found. The demo mode uses a weak default password ('password') that ships to buyers and is visible in factory files. Several .env.example entries use realistic-looking placeholders (sk_live_, whsec_) that could be mistaken for real values. The codebase correctly uses environment variables and encrypted storage for all production credentials.

Warning 4 **Strong admin/auth guards; minor ownership gaps on customer reads (orders, addresses, returns)**

All admin routes require authentication and role-based authorization via AuthorizeAdminArea middleware. Mutating endpoints are properly guarded. However, several customer-facing read endpoints (order details, addresses, returns) lack explicit ownership checks—a customer could potentially view another's data by changing the ID in the URL. Password storage uses bcrypt correctly throughout.

Requirement list

What the builder agreed to deliver before uploading — 15 of 15 met.

✓	Complete source for every component	Met
✓	No real credentials in the archive	Met
✓	Builds from a clean machine	Met
✓	Database script or migrations	Met
✓	Authentication and roles on every mutating endpoint	Met
✓	Pinned dependencies without critical CVEs (nice)	Met
✓	Documentation set (nice)	Met
✓	Working live demo	Met
✓	README.md	Met
✓	HowToSetup.md	Met
✓	CLAUDE.md (or AGENTS.md) (nice)	Met
✓	CHANGELOG.md (nice)	Met
✓	.env.example	Met
✓	a project file	Met
✓	a project file (nice)	Met

PART 2

Human review

Reviewers from the Vibe96 team in Dubai worked through each question below; a final reviewer signed it off.

Stage 1 — Installed and run from the delivered code

Completed 23 Oct 2026

A reviewer installed the product on a clean machine, following only the guide that ships with it.

QUESTION	ANSWER	REVIEWER'S NOTE
Packages restored without errors	Yes	
Solution builds clean	Yes	
Database created from the shipped script or migrations	Yes	
First sign-in works with the documented steps	Yes	
Setup guide is accurate and complete	Yes	
Every module in the feature list opens and works	Yes	
No real secrets in the archive	Yes	
Branding and company details can be changed without code	Yes	

Stage 2 — Live demo compared with the delivered code

Completed 23 Oct 2026

A second reviewer checked that what the listing and demo show is what the buyer receives.

QUESTION	ANSWER	REVIEWER'S NOTE
Demo URL is reachable	Yes	
Demo credentials work	Yes	
Demo runs the same version as the archive	Yes	
All five differentiators are visible in the demo	Yes	
Screenshots match the demo	Yes	
Nothing in the demo is missing from the code	Yes	
Datasheet claims are accurate	Yes	

Changes asked for during review

None — approved on the first round.

Sign-off: approved for sale on 23 Oct 2026 with 4 warnings shown publicly.

What this report covers — and what it doesn't

- **It covers** version 1.3.0 exactly as the buyer downloads it: the source archive, the setup guide and the live demo on the dates above.

- **It is not** a penetration test, a performance or load test, or a legal review of third-party package licences.
- **Scores are a point in time.** Libraries age; a later version is audited again and gets its own report.
- **Your setup matters.** Hosting, configuration and changes made after purchase are outside this review.
- **How the score is made:** each AI check is scored 0–100 and weighted (security counts most). A listing needs 75 or more, no failing check, and the human review passed.
- **Always try the live demo** before buying, and ask the builder questions from the product page.
