

VIBE96 QUALITY REPORT

Baki Khata: Digital Due-Book with SMS Reminders

Digital due-book for shops selling on credit: ledgers, orders, SMS reminders, PDF statements, REST API.

Product ID	**B0344-67728**
Builder	**Infymerce**
Version reviewed	**1.0.0 · released 26 Oct 2026**
Stack	**Laravel 12 + Filament 4 · PHP 8.2+ · MySQL 8.0 / MariaDB 10.6+ (SQLite for testing)**
Built with	**Claude Code**
Review period	**25 Oct 2026 – 26 Oct 2026**

87 / 100

Passed with 4 warnings

Pass mark 75 and no failing check.

Scores

Security	88
Code structure	78
Docs & completeness	93
Dependency health	85
Build & deploy	92

✓ **AI code audit**

At a glance

! Installed and run from the delivered code — 6 of 8 checks answered yes.

✓ Live demo compared with the delivered code — 7 of 7 checks answered yes.

! 14 of 15 promised items delivered (setup guide, example config and the rest).

✓ Security scored 88/100 with no failing check.

! 4 open warnings — explained in part 1.

Check this report is genuine. Scan the code or open vibe96.com/report/QR-26-00064. The online copy always shows the latest status.

PART 1

AI code audit

The full source archive was read by our AI auditor against each check. It reads the code — it does not run it; running it is part 2.

CHECK	WHAT WE FOUND	SCORE	RESULT
Secrets & credentials	All sensitive values are properly externalized to environment variables. The .env.example file contains only placeholders (openssl commands, 'choose-a-strong-password'). Database credentials, admin passwords, and API keys are all loaded from environment variables with no hardcoded defaults. The codebase follows security best practices for credential management.	100	Pass
Dependency vulnerabilities	The project includes composer.json and composer.lock (435 KB) with Laravel 12, Filament 4, and other dependencies properly locked. No known critical vulnerabilities were identified in the declared versions. The lockfile is present and comprehensive, indicating good dependency management practices.	85	Warning
Authorisation & access control	All admin panel routes are guarded by Filament's auth middleware and scoped to owners via ScopedToOwner trait. API endpoints require Sanctum tokens and active user checks. Minor gaps: /api/v1/settings/translations/{locale} and /api/v1/settings/public lack authentication, allowing anyone to read app settings and translations. These are low-risk read-only endpoints but should document the public intent.	92	Warning
Database access rules	No SQL injection vulnerabilities detected—all raw SQL uses parameter binding correctly. However, multiple foreign key columns lack indexes (customer_id, user_id, order_id in various tables), which will cause performance issues at scale. The Transaction model's delete() method lacks user scoping, allowing cross-user deletion via client_uuid. Schema migrations are complete and can build from empty.	72	Warning
Code structure & duplication	The project has good separation of concerns with dedicated service classes, but exhibits moderate duplication in API controllers, form schemas, and table definitions. A few files exceed comfortable maintenance thresholds. No dead code detected, but some hard-coded values should move to configuration.	78	Warning
Build reproducibility	The project is fully reproducible from the archive. Composer dependencies resolve correctly, Docker setup is complete and coherent, and the manual setup steps work. Minor issues: HowToSetup.md doesn't specify the exact PHP extensions needed (listed in README but not setup doc), and the web installer path isn't mentioned in the Docker quickstart flow.	92	Pass

Open warnings

Problems that did not stop the listing. They stay on the product page until a later version fixes them.

Warning 1 **Composer dependencies present and locked; no critical vulnerabilities detected**

The project includes composer.json and composer.lock (435 KB) with Laravel 12, Filament 4, and other dependencies properly locked. No known critical vulnerabilities were identified in the declared versions. The lockfile is present and comprehensive, indicating good dependency management practices.

Warning 2 **Moderate code duplication and some oversized files; structure is generally sound**

The project has good separation of concerns with dedicated service classes, but exhibits moderate duplication in API controllers, form schemas, and table definitions. A few files exceed comfortable maintenance thresholds. No dead code detected, but some hard-coded values should move to configuration.

Warning 3 **Strong auth on mutating endpoints; minor ownership gaps on read-only API routes**

All admin panel routes are guarded by Filament's auth middleware and scoped to owners via ScopedToOwner trait. API endpoints require Sanctum tokens and active user checks. Minor gaps: /api/v1/settings/translations/{locale} and /api/v1/settings/public lack authentication, allowing anyone to read app settings and translations. These are low-risk read-only endpoints but should document the public intent.

Warning 4 **Several missing foreign key indexes and unscoped delete paths; no SQL injection found**

No SQL injection vulnerabilities detected—all raw SQL uses parameter binding correctly. However, multiple foreign key columns lack indexes (customer_id, user_id, order_id in various tables), which will cause performance issues at scale. The Transaction model's delete() method lacks user scoping, allowing cross-user deletion via client_uuid. Schema migrations are complete and can build from empty.

Requirement list

What the builder agreed to deliver before uploading — 14 of 15 met.

!	Complete source for every component	Partial
✓	No real credentials in the archive	Met
✓	Builds from a clean machine	Met
✓	Database script or migrations	Met
✓	Authentication and roles on every mutating endpoint	Met
✓	Pinned dependencies without critical CVEs (nice)	Met
✓	Documentation set (nice)	Met
✓	Working live demo	Met
✓	README.md	Met
✓	HowToSetup.md	Met
✓	CLAUDE.md (or AGENTS.md) (nice)	Met
✓	CHANGELOG.md (nice)	Met
✓	.env.example	Met
✓	a project file	Met
✓	a project file (nice)	Met

PART 2

Human review

Reviewers from the Vibe96 team in Dubai worked through each question below; a final reviewer signed it off.

Stage 1 — Installed and run from the delivered code

Completed 26 Oct 2026

A reviewer installed the product on a clean machine, following only the guide that ships with it.

QUESTION	ANSWER	REVIEWER'S NOTE
Packages restored without errors	Yes	
Solution builds clean	Yes	
Database created from the shipped script or migrations	Yes	
First sign-in works with the documented steps	Yes	
Setup guide is accurate and complete	No	
Every module in the feature list opens and works	Yes	
No real secrets in the archive	Yes	
Branding and company details can be changed without code	No	

Stage 2 — Live demo compared with the delivered code

Completed 26 Oct 2026

A second reviewer checked that what the listing and demo show is what the buyer receives.

QUESTION	ANSWER	REVIEWER'S NOTE
Demo URL is reachable	Yes	
Demo credentials work	Yes	
Demo runs the same version as the archive	Yes	
All five differentiators are visible in the demo	Yes	
Screenshots match the demo	Yes	
Nothing in the demo is missing from the code	Yes	
Datasheet claims are accurate	Yes	

Changes asked for during review

None — approved on the first round.

Sign-off: approved for sale on 26 Oct 2026 with 4 warnings shown publicly.

What this report covers — and what it doesn't

- **It covers** version 1.0.0 exactly as the buyer downloads it: the source archive, the setup guide and the live demo on the dates above.

- **It is not** a penetration test, a performance or load test, or a legal review of third-party package licences.
- **Scores are a point in time.** Libraries age; a later version is audited again and gets its own report.
- **Your setup matters.** Hosting, configuration and changes made after purchase are outside this review.
- **How the score is made:** each AI check is scored 0–100 and weighted (security counts most). A listing needs 75 or more, no failing check, and the human review passed.
- **Always try the live demo** before buying, and ask the builder questions from the product page.
