

VIBE96 QUALITY REPORT

HR Manager: Employees, Attendance, Leave & Payroll

Employee, attendance, leave, payroll and hiring system for small companies

Product ID	**B0344-77482**
Builder	**Infymerce**
Version reviewed	**1.0.0 · released 26 Oct 2026**
Stack	**Laravel 13.17 + Filament 5.10 · PHP 8.3+ · MySQL 8.0+ (SQLite for local development)**
Built with	**Claude Code**
Review period	**24 Oct 2026 – 26 Oct 2026**

93 / 100

Passed with 3 warnings

Pass mark 75 and no failing check.

Scores

Security	96
Code structure	78
Docs & completeness	100

Build & deploy	92

✓ **AI code audit**
6 checks · 24 Oct 2026

✓ **Installed & run**
26 Oct 2026

✓ **Demo vs delivered**
26 Oct 2026

✓ **Final sign-off**
26 Oct 2026

At a glance

- ✓ Installed and run from the delivered code — 8 of 8 checks answered yes.
- ✓ Live demo compared with the delivered code — 7 of 7 checks answered yes.
- ✓ 15 of 15 promised items delivered (setup guide, example config and the rest).
- ✓ Security scored 96/100 with no failing check.
- ! 3 open warnings — explained in part 1.

Check this report is genuine. Scan the code or open vibe96.com/report/QR-26-00065. The online copy always shows the latest status.

PART 1

AI code audit

The full source archive was read by our AI auditor against each check. It reads the code — it does not run it; running it is part 2.

CHECK	WHAT WE FOUND	SCORE	RESULT
Secrets & credentials	All sensitive configuration is properly externalized to environment variables. The .env.example file contains only placeholders and instructions. Database passwords, admin passwords, and API keys are all loaded from environment variables with appropriate validation.	100	Pass
Dependency vulnerabilities	All production dependencies are pinned in composer.lock and package-lock.json. No known critical vulnerabilities detected in Laravel 13.17, Filament 5.10, or other packages. A few dev dependencies could be updated but pose no security risk.	95	Pass
Authorisation & access control	All mutating endpoints are properly guarded with authentication and policies. Filament resources use comprehensive policies checking roles and reporting lines. Two minor gaps: the public careers page lacks rate limiting per IP (only per email), and the demo landing page at `/` is accessible without authentication when DEMO_MODE is off and careers are disabled.	95	Warning
Database access rules	No SQL injection risks found. Query builders and Eloquent are used correctly throughout. One unscoped delete in EmployeeService (line 113) operates on user data without a WHERE clause, though it's protected by policy checks. Several foreign key columns lack indexes (employee_id, leave_type_id, shift_id in multiple tables), which will hurt performance as data grows.	92	Warning
Code structure & duplication	The application has well-organized module boundaries with business logic properly isolated in Services. However, there is significant duplication between .agents/ and .claude/ skill directories (identical copies), and some configuration values are hard-coded in documentation rather than centralized. A few oversized files exist but are acceptable for their domain.	78	Warning
Build reproducibility	The project is fully reproducible via Docker Compose or manual setup. All dependencies resolve correctly, framework versions are consistent (Laravel 13, Filament 5, PHP 8.3+), and build artifacts are properly excluded. Minor issues: HowToSetup.md references a non-existent a project file file for manual setup, and the Docker entrypoint script location isn't documented.	92	Pass

Open warnings

Problems that did not stop the listing. They stay on the product page until a later version fixes them.

Warning 1 **Strong authentication and authorization with minor read-access gaps**

All mutating endpoints are properly guarded with authentication and policies. Filament resources use comprehensive policies checking roles and reporting lines. Two minor gaps: the public careers page lacks rate limiting per IP (only per email), and the demo landing page at `/` is accessible without authentication when DEMO_MODE is off and careers are disabled.

Warning 2 **Good module boundaries with some duplication in agent/claude skill files and minor hard-coded values**

The application has well-organized module boundaries with business logic properly isolated in Services. However, there is significant duplication between .agents/ and .claude/ skill directories (identical copies), and some configuration values are hard-coded in documentation rather than centralized. A few oversized files exist but are acceptable for their domain.

Warning 3 **Database access is mostly safe; a few missing indexes and one unscoped delete**

No SQL injection risks found. Query builders and Eloquent are used correctly throughout. One unscoped delete in EmployeeService (line 113) operates on user data without a WHERE clause, though it's protected by policy checks. Several foreign key columns lack indexes (employee_id, leave_type_id, shift_id in multiple tables), which will hurt performance as data grows.

Requirement list

What the builder agreed to deliver before uploading — 15 of 15 met.

✓	Complete source for every component	Met
✓	No real credentials in the archive	Met
✓	Builds from a clean machine	Met
✓	Database script or migrations	Met
✓	Authentication and roles on every mutating endpoint	Met
✓	Pinned dependencies without critical CVEs (nice)	Met
✓	Documentation set (nice)	Met
✓	Working live demo	Met
✓	README.md	Met
✓	HowToSetup.md	Met
✓	CLAUDE.md (or AGENTS.md) (nice)	Met
✓	CHANGELOG.md (nice)	Met
✓	.env.example	Met
✓	a project file	Met
✓	a project file (nice)	Met

PART 2

Human review

Reviewers from the Vibe96 team in Dubai worked through each question below; a final reviewer signed it off.

Stage 1 — Installed and run from the delivered code

Completed 26 Oct 2026

A reviewer installed the product on a clean machine, following only the guide that ships with it.

QUESTION	ANSWER	REVIEWER'S NOTE
Packages restored without errors	Yes	
Solution builds clean	Yes	
Database created from the shipped script or migrations	Yes	
First sign-in works with the documented steps	Yes	
Setup guide is accurate and complete	Yes	
Every module in the feature list opens and works	Yes	
No real secrets in the archive	Yes	
Branding and company details can be changed without code	Yes	

Stage 2 — Live demo compared with the delivered code

Completed 26 Oct 2026

A second reviewer checked that what the listing and demo show is what the buyer receives.

QUESTION	ANSWER	REVIEWER'S NOTE
Demo URL is reachable	Yes	
Demo credentials work	Yes	
Demo runs the same version as the archive	Yes	
All five differentiators are visible in the demo	Yes	
Screenshots match the demo	Yes	
Nothing in the demo is missing from the code	Yes	
Datasheet claims are accurate	Yes	

Changes asked for during review

None — approved on the first round.

Sign-off: approved for sale on 26 Oct 2026 with 3 warnings shown publicly.

What this report covers — and what it doesn't

- **It covers** version 1.0.0 exactly as the buyer downloads it: the source archive, the setup guide and the live demo on the dates above.

- **It is not** a penetration test, a performance or load test, or a legal review of third-party package licences.
- **Scores are a point in time.** Libraries age; a later version is audited again and gets its own report.
- **Your setup matters.** Hosting, configuration and changes made after purchase are outside this review.
- **How the score is made:** each AI check is scored 0–100 and weighted (security counts most). A listing needs 75 or more, no failing check, and the human review passed.
- **Always try the live demo** before buying, and ask the builder questions from the product page.
