

VIBE96 QUALITY REPORT

Car Rental Manager: Fleet, Bookings & Returns

Fleet, bookings, handover and returns for small car rental companies

Product ID	**B0344-31655**
Builder	**Infymerce**
Version reviewed	**1.0.0 · released 28 Oct 2026**
Stack	**Laravel 13.17 + Filament 5.10 · PHP 8.4+ · MySQL 8.0+ or MariaDB 10.6+**
Built with	**Claude Code**
Review period	**25 Oct 2026 – 28 Oct 2026 · 1 round of changes**

93 / 100

Passed with 3 warnings

Pass mark 75 and no failing check.

Scores

Security	95
Code structure	78
Docs & completeness	100
Dependency health	95
Build & deploy	92

✓ **AI code audit**
6 checks · 24 Oct 2026

✓ **Installed & run**

At a glance

! Installed and run from the delivered code — 6 of 7 checks answered yes.
✓ Live demo compared with the delivered code — 7 of 7 checks answered yes.
✓ 15 of 15 promised items delivered (setup guide, example config and the rest).
✓ Security scored 95/100 with no failing check.
! 3 open warnings — explained in part 1.

Check this report is genuine. Scan the code or open vibe96.com/report/QR-26-00079. The online copy always shows the latest status.

PART 1

AI code audit

The full source archive was read by our AI auditor against each check. It reads the code — it does not run it; running it is part 2.

CHECK	WHAT WE FOUND	SCORE	RESULT
Secrets & credentials	All sensitive credentials are properly externalized to environment variables. The .env.example file contains only placeholders and instructions. Database passwords, admin passwords, and demo credentials all require explicit configuration via environment variables with clear documentation.	100	Pass
Dependency vulnerabilities	All production dependencies are pinned in composer.lock (402 KB) and package-lock.json. No known critical vulnerabilities detected in Laravel 13.17, Filament 5.10, or other packages. A few dev dependencies could be updated but pose no security risk.	95	Pass
Authorisation & access control	All admin routes are protected by Filament's authentication and policies. Public booking creation is rate-limited with honeypot protection. The signed URL for viewing a booking does not verify the customer owns it (anyone with the link can view), and the demo login endpoints lack CSRF protection on POST requests.	92	Warning
Database access rules	No SQL injection risks or unscoped destructive queries found. All queries use parameter binding or Eloquent. Schema is complete with proper foreign keys and cascades. However, several foreign key columns lack indexes (car_id, customer_id, branch_id, category_id), which will cause performance issues as data grows.	92	Warning
Code structure & duplication	The project has clear separation between controllers, services, and models following Laravel conventions. However, some service classes are large and contain multiple responsibilities, and there is minor code duplication in validation and query patterns. Configuration is mostly externalized but a few hard-coded values remain.	78	Warning
Build reproducibility	The project is fully reproducible with Docker or manual setup. All dependencies resolve correctly, framework versions are consistent (Laravel 13, PHP 8.3+), and build artifacts are properly excluded. HowToSetup.md provides clear instructions but could be more explicit about Node.js version requirements and the order of environment variable setup.	92	Pass

Open warnings

Problems that did not stop the listing. They stay on the product page until a later version fixes them.

Warning 1 **Good module boundaries with some duplication and oversized service classes**

The project has clear separation between controllers, services, and models following Laravel conventions. However, some service classes are large and contain multiple responsibilities, and there is minor code duplication in validation and query patterns. Configuration is mostly externalized but a few hard-coded values remain.

Warning 2 **Database access is safe; minor schema gaps (missing indexes on foreign keys)**

No SQL injection risks or unscoped destructive queries found. All queries use parameter binding or Eloquent. Schema is complete with proper foreign keys and cascades. However, several foreign key columns lack indexes (car_id, customer_id, branch_id, category_id), which will cause performance issues as data grows.

Warning 3 **Strong authentication on all mutating endpoints; minor ownership gaps on public booking views**

All admin routes are protected by Filament's authentication and policies. Public booking creation is rate-limited with honeypot protection. The signed URL for viewing a booking does not verify the customer owns it (anyone with the link can view), and the demo login endpoints lack CSRF protection on POST requests.

Requirement list

What the builder agreed to deliver before uploading — 15 of 15 met.

✓	Complete source for every component	Met
✓	No real credentials in the archive	Met
✓	Builds from a clean machine	Met
✓	Database script or migrations	Met
✓	Authentication and roles on every mutating endpoint	Met
✓	Pinned dependencies without critical CVEs (nice)	Met
✓	Documentation set (nice)	Met
✓	Working live demo	Met
✓	README.md	Met
✓	HowToSetup.md	Met
✓	CLAUDE.md (or AGENTS.md) (nice)	Met
✓	CHANGELOG.md (nice)	Met
✓	.env.example	Met
✓	a project file	Met
✓	a project file (nice)	Met

PART 2

Human review

Reviewers from the Vibe96 team in Dubai worked through each question below; a final reviewer signed it off.

Stage 1 — Installed and run from the delivered code

Completed 28 Oct 2026

A reviewer installed the product on a clean machine, following only the guide that ships with it.

QUESTION	ANSWER	REVIEWER'S NOTE
Packages restored without errors	No	
Solution builds clean	Yes	
Database created from the shipped script or migrations	Yes	
First sign-in works with the documented steps	Yes	
Setup guide is accurate and complete	Yes	
Every module in the feature list opens and works	Yes	
No real secrets in the archive	N/A	
Branding and company details can be changed without code	Yes	

Stage 2 — Live demo compared with the delivered code

Completed 28 Oct 2026

A second reviewer checked that what the listing and demo show is what the buyer receives.

QUESTION	ANSWER	REVIEWER'S NOTE
Demo URL is reachable	Yes	
Demo credentials work	Yes	
Demo runs the same version as the archive	Yes	
All five differentiators are visible in the demo	Yes	
Screenshots match the demo	Yes	
Nothing in the demo is missing from the code	Yes	
Datasheet claims are accurate	Yes	

Changes asked for during review

Round 1: changes requested on 26 Oct 2026; the builder fixed them and uploaded again.

Sign-off: approved for sale on 28 Oct 2026 with 3 warnings shown publicly.

What this report covers — and what it doesn't

- **It covers** version 1.0.0 exactly as the buyer downloads it: the source archive, the setup guide and the live demo on the dates above.

- **It is not** a penetration test, a performance or load test, or a legal review of third-party package licences.
- **Scores are a point in time.** Libraries age; a later version is audited again and gets its own report.
- **Your setup matters.** Hosting, configuration and changes made after purchase are outside this review.
- **How the score is made:** each AI check is scored 0–100 and weighted (security counts most). A listing needs 75 or more, no failing check, and the human review passed.
- **Always try the live demo** before buying, and ask the builder questions from the product page.
