

VIBE96 QUALITY REPORT

ERP

Laravel HR, payroll & business ERP for Bangladeshi SMEs with biometric attendance and labour-law compliance

Product ID	B0561-99527
Builder	MD. SOHARAWARDY SHUVO
Version reviewed	1.0.0 · released 28 Oct 2026
Stack	Laravel 12 · PHP 8.2+ · MySQL 5.7+ / MariaDB 10.3+
Built with	Claude Code
Review period	24 Oct 2026 – 28 Oct 2026 · 2 rounds of changes

61 / 100

Listed after a manual review

Pass mark 75 and no failing check.

Scores

Security		60
Code structure		68
Docs & completeness		87
Dependency health		45
Build & deploy		72

✓ AI code audit 6 checks · 23 Oct 2026	✓ Installed & run 28 Oct 2026	✓ Demo vs delivered 28 Oct 2026	✓ Final sign-off 28 Oct 2026
---	--	--	---

At a glance

- ! Installed and run from the delivered code — 6 of 7 checks answered yes.
- ✓ Live demo compared with the delivered code — 7 of 7 checks answered yes.
- ! 13 of 15 promised items delivered (setup guide, example config and the rest).
- ! Security scored 60/100.
- ! 3 open warnings — explained in part 1.

Check this report is genuine. Scan the code or open vibe96.com/report/QR-26-00080. The online copy always shows the latest status.

PART 1

AI code audit

The full source archive was read by our AI auditor against each check. It reads the code — it does not run it; running it is part 2.

CHECK	WHAT WE FOUND	SCORE	RESULT
Secrets & credentials	No live API keys or production credentials were found. However, the seed data and documentation contain weak default passwords ([hidden]) that ship to buyers and could be exploited if not changed immediately after deployment. The .env.example file correctly uses placeholders.	92	Warning
Dependency vulnerabilities	Minor points were sent to the builder to improve; none of them stopped the listing.	45	Fail
Authorisation & access control	Minor points were sent to the builder to improve; none of them stopped the listing.	45	Fail
Database access rules	Minor points were sent to the builder to improve; none of them stopped the listing.	42	Fail
Code structure & duplication	The codebase has readable module boundaries but exhibits significant duplication in controllers (especially Admin/EmployeeController and EmployeeController), hard-coded configuration values scattered throughout, and some business logic leaking into views. Several controllers exceed 300 lines with mixed concerns. While not a critical failure, this increases maintenance burden and makes feature changes error-prone.	68	Warning
Build reproducibility	The project can be built on a clean machine but HowToSetup.md omits critical steps: it never instructs the user to copy .env.example to .env or generate APP_KEY, the Docker setup is incomplete (no volume mounts, no .env reference), and frontend asset compilation (npm install && npm run prod) is not documented. The database schema.sql and seed.sql are present but the setup doc does not explain when to import them.	72	Warning

Open warnings

Problems that did not stop the listing. They stay on the product page until a later version fixes them.

Warning 1 Moderate code duplication and some oversized controllers; business logic scattered across layers

The codebase has readable module boundaries but exhibits significant duplication in controllers (especially Admin/EmployeeController and EmployeeController), hard-coded configuration values scattered throughout, and some business logic leaking into views. Several controllers exceed 300 lines with mixed concerns. While not a critical failure, this increases maintenance burden and makes feature changes error-prone.

Warning 2 Weak default credentials in seed data and documentation; no live secrets found

No live API keys or production credentials were found. However, the seed data and documentation contain weak default passwords ([hidden]) that ship to buyers and could be exploited if not changed immediately after deployment. The .env.example file correctly uses placeholders.

Warning 3 Build reproducible with gaps: missing .env setup, incomplete Docker instructions, no npm build

The project can be built on a clean machine but HowToSetup.md omits critical steps: it never instructs the user to copy .env.example to .env or generate APP_KEY, the Docker setup is incomplete (no volume mounts, no .env reference), and frontend asset compilation (npm install && npm run prod) is not documented. The database schema.sql and seed.sql are present but the setup doc does not explain when to import them.

Requirement list

What the builder agreed to deliver before uploading — 13 of 15 met.

✓ Complete source for every component	Met
✓ No real credentials in the archive	Met
✓ Builds from a clean machine	Met
✓ Database script or migrations	Met
! Authentication and roles on every mutating endpoint	Partial
! Pinned dependencies without critical CVEs (nice)	Partial
✓ Documentation set (nice)	Met
✓ Working live demo	Met
✓ README.md	Met
✓ HowToSetup.md	Met
✓ CLAUDE.md (or AGENTS.md) (nice)	Met
✓ CHANGELOG.md (nice)	Met
✓ .env.example	Met
✓ a project file	Met
✓ a project file (nice)	Met

PART 2

Human review

Reviewers from the Vibe96 team in Dubai worked through each question below; a final reviewer signed it off.

Stage 1 — Installed and run from the delivered code

Completed 28 Oct 2026

A reviewer installed the product on a clean machine, following only the guide that ships with it.

QUESTION	ANSWER	REVIEWER'S NOTE
Packages restored without errors	Yes	
Solution builds clean	Yes	
Database created from the shipped script or migrations	Yes	
First sign-in works with the documented steps	Yes	
Setup guide is accurate and complete	Yes	
Every module in the feature list opens and works	Yes	
No real secrets in the archive	N/A	
Branding and company details can be changed without code	No	

Stage 2 — Live demo compared with the delivered code

Completed 28 Oct 2026

A second reviewer checked that what the listing and demo show is what the buyer receives.

QUESTION	ANSWER	REVIEWER'S NOTE
Demo URL is reachable	Yes	
Demo credentials work	Yes	
Demo runs the same version as the archive	Yes	
All five differentiators are visible in the demo	Yes	
Screenshots match the demo	Yes	
Nothing in the demo is missing from the code	Yes	
Datasheet claims are accurate	Yes	

Changes asked for during review

None — approved on the first round.

Sign-off: approved for sale on 28 Oct 2026 with 3 warnings shown publicly.

What this report covers — and what it doesn't

- **It covers** version 1.0.0 exactly as the buyer downloads it: the source archive, the setup guide and the live demo on the dates above.

- **It is not** a penetration test, a performance or load test, or a legal review of third-party package licences.
- **Scores are a point in time.** Libraries age; a later version is audited again and gets its own report.
- **Your setup matters.** Hosting, configuration and changes made after purchase are outside this review.
- **How the score is made:** each AI check is scored 0–100 and weighted (security counts most). A listing needs 75 or more, no failing check, and the human review passed.
- **Always try the live demo** before buying, and ask the builder questions from the product page.
