

VIBE96 QUALITY REPORT

GetRavista: Agency Project Management & Client Approval SaaS

Agency project management SaaS with client approvals, task boards, messaging and Stripe billing

Product ID	**B0148-56050**
Builder	**AHMAD**
Version reviewed	**1.3.0 · released 4 Nov 2026**
Stack	**Laravel 13, Livewire 4 · PHP 8.4 · MySQL 8 / MariaDB 10.6**
Built with	**OpenAI Codex, Claude Code**
Review period	**3 Nov 2026 – 4 Nov 2026**

82 / 100

Passed with 3 warnings

Pass mark 75 and no failing check.

Scores

Security	83
Code structure	84
Docs & completeness	100
Dependency health	85
Build & deploy	78

✓ **AI code audit**

At a glance

- ✓ Installed and run from the delivered code — 7 of 7 checks answered yes.
- ✓ Live demo compared with the delivered code — 7 of 7 checks answered yes.
- ✓ 15 of 15 promised items delivered (setup guide, example config and the rest).
- ✓ Security scored 83/100 with no failing check.
- ! 3 open warnings — explained in part 1.

Check this report is genuine. Scan the code or open vibe96.com/report/QR-26-00087. The online copy always shows the latest status.

PART 1

AI code audit

The full source archive was read by our AI auditor against each check. It reads the code — it does not run it; running it is part 2.

CHECK	WHAT WE FOUND	SCORE	RESULT
Secrets & credentials	Every regex candidate is a placeholder in docs (sk_test_..., sk-ant-..., whsec_..., your-random-secret-here) or a PHP reference such as Password:[hidden] or config() lookups. No committed .env, private keys or live tokens appeared in the digest. Not every file was visible, so the pass rests on the candidates shown.	96	Pass
Dependency vulnerabilities	Both composer.lock and package-lock.json are present, and composer.json and package.json use caret/tilde ranges on current major versions (Laravel 13, Livewire 4, Stripe 17, Vite 8). No wildcard or pre-release constraints are visible. The lockfile contents were omitted from the digest, so installed versions could not be checked against advisories.	85	Pass
Authorisation & access control	Visible routes sit behind auth, workspace, role and subscription middleware, and the exports check roles, project ownership and policies. The digest truncates web.php, the Livewire components and the services, so several mutating endpoints and id lookups could not be traced. Those gaps keep the score below the top band.	80	Warning
Database access rules	The files shown (RegisteredUserController, ExportController, routes) use Eloquent, validation and policy checks, and no string-built SQL or unscoped deletes appear. The services, Livewire components, models and migrations that carry the real query logic (TaskQueryService, QuickFind, Directory, GuestWorkspaceService) were not in the digest. The score is capped until those are reviewed.	72	Warning
Code structure & duplication	The project follows a clear domain split: Livewire components, one service per domain, policies and a BelongsToOrganization trait, with large Livewire components split into Concerns traits. Remaining issues are mostly small: a duplicated project-scoping lookup and some business logic in export and registration paths that could be moved into services.	84	Pass
Build reproducibility	composer.json pins PHP ^8.4, Laravel 13, Livewire 4 and the lockfiles are present. The setup script runs install, .env copy, key:generate and getravista:install in a sensible order. Gaps: compiled assets are committed in public/build, and the digest did not show the setup document's database creation step or the Node and database prerequisites.	78	Warning

Open warnings

Problems that did not stop the listing. They stay on the product page until a later version fixes them.

Warning 1 **Build mostly reproducible; compiled assets are committed and some setup details could not be verified**

composer.json pins PHP ^8.4, Laravel 13, Livewire 4 and the lockfiles are present. The setup script runs install, .env copy, key:generate and getravista:install in a sensible order. Gaps: compiled assets are committed in public/build, and the digest did not show the setup document's database creation step or the Node and database prerequisites.

Warning 2 **Routes well layered, but several mutating/ID-based paths could not be verified from the digest**

Visible routes sit behind auth, workspace, role and subscription middleware, and the exports check roles, project ownership and policies. The digest truncates web.php, the Livewire components and the services, so several mutating endpoints and id lookups could not be traced. Those gaps keep the score below the top band.

Warning 3 **No injection seen in visible code, but most DB code and the schema were not available to verify**

The files shown (RegisteredUserController, ExportController, routes) use Eloquent, validation and policy checks, and no string-built SQL or unscoped deletes appear. The services, Livewire components, models and migrations that carry the real query logic (TaskQueryService, QuickFind, Directory, GuestWorkspaceService) were not in the digest. The score is capped until those are reviewed.

Requirement list

What the builder agreed to deliver before uploading — 15 of 15 met.

✓	Complete source for every component	Met
✓	No real credentials in the archive	Met
✓	Builds from a clean machine	Met
✓	Database script or migrations	Met
✓	Authentication and roles on every mutating endpoint	Met
✓	Pinned dependencies without critical CVEs (nice)	Met
✓	Documentation set (nice)	Met
✓	Working live demo	Met
✓	README.md	Met
✓	HowToSetup.md	Met
✓	CLAUDE.md (or AGENTS.md) (nice)	Met
✓	CHANGELOG.md (nice)	Met
✓	.env.example	Met
✓	a project file	Met
✓	a project file (nice)	Met

PART 2

Human review

Reviewers from the Vibe96 team in Dubai worked through each question below; a final reviewer signed it off.

Stage 1 — Installed and run from the delivered code

Completed 3 Nov 2026

A reviewer installed the product on a clean machine, following only the guide that ships with it.

QUESTION	ANSWER	REVIEWER'S NOTE
Packages restored without errors	Yes	
Solution builds clean	Yes	
Database created from the shipped script or migrations	Yes	
First sign-in works with the documented steps	Yes	
Setup guide is accurate and complete	Yes	
Every module in the feature list opens and works	N/A	
No real secrets in the archive	Yes	
Branding and company details can be changed without code	Yes	

Stage 2 — Live demo compared with the delivered code

Completed 4 Nov 2026

A second reviewer checked that what the listing and demo show is what the buyer receives.

QUESTION	ANSWER	REVIEWER'S NOTE
Demo URL is reachable	Yes	
Demo credentials work	Yes	
Demo runs the same version as the archive	Yes	
All five differentiators are visible in the demo	Yes	
Screenshots match the demo	Yes	
Nothing in the demo is missing from the code	Yes	
Datasheet claims are accurate	Yes	

Changes asked for during review

None — approved on the first round.

Sign-off: approved for sale on 4 Nov 2026 with 3 warnings shown publicly.

What this report covers — and what it doesn't

- **It covers** version 1.3.0 exactly as the buyer downloads it: the source archive, the setup guide and the live demo on the dates above.

- **It is not** a penetration test, a performance or load test, or a legal review of third-party package licences.
- **Scores are a point in time.** Libraries age; a later version is audited again and gets its own report.
- **Your setup matters.** Hosting, configuration and changes made after purchase are outside this review.
- **How the score is made:** each AI check is scored 0–100 and weighted (security counts most). A listing needs 75 or more, no failing check, and the human review passed.
- **Always try the live demo** before buying, and ask the builder questions from the product page.
