

VIBE96 QUALITY REPORT

Kinroll - Membership Management System

Self-hosted membership system for clubs, associations and non-profits: joining, dues, member portal, email and SMS.

Product ID	**B1042-48611**
Builder	**Atiq Rahman**
Version reviewed	**1.0.0 · released 13 Nov 2026**
Stack	**Express 4 (API) and Next.js 16 with React 19 (web) · JavaScript (Node.js 24) with JSX, CommonJS backend · PostgreSQL 17 via Prisma 5, with Redis for job queues**
Built with	**Claude Code**
Review period	**6 Nov 2026 – 13 Nov 2026 · 2 rounds of changes**

77 / 100

Passed with 4 warnings

Pass mark 75 and no failing check.

At a glance

- ✓ Installed and run from the delivered code — 8 of 8 checks answered yes.
- ✓ Live demo compared with the delivered code — 7 of 7 checks answered yes.
- ! 17 of 28 promised items delivered (setup guide, example config and the rest).
- ✓ Security scored 76/100 with no failing check.
- ! 4 open warnings — explained in part 1.

Check this report is genuine. Scan the code or open vibe96.com/report/QR-26-00137. The online copy always shows the latest status.

PART 1

AI code audit

The full source archive was read by our AI auditor against each check. It reads the code — it does not run it; running it is part 2.

CHECK	WHAT WE FOUND	SCORE	RESULT
Secrets & credentials	No live API keys, private keys or production connection strings were found. The regex hits are placeholders, CI test values or code that handles passwords. Two weak-default items remain: a published demo password for the live demo (documented in README and used in an export script), and `change-me-*` JWT secrets in .env.example that pass the [hidden] minimum, so a buyer could ship them unchanged.	88	Warning
Dependency vulnerabilities	Backend, frontend and e2e each have a package-lock.json, and no wildcard or 'latest' versions appear in the manifests. Dependencies use caret ranges, which is normal, and the backend pins overrides for exceljs/unzipper and uuid. Some versions look unusual or old (Prisma 5.x, Express 4, Next.js pinned exactly), and the root has no lockfile, so this is a warning-level review rather than a failure.	80	Pass
Authorisation & access control	The visible code hashes passwords with bcrypt, applies login lockout, and separates admin access from member accounts on the user type's isMemberType flag. The digest omits the route files (admin.js, membership.js, etc.) and the controllers behind them, so per-route guards and id-based ownership checks could not be verified. The score is capped for that reason, not because a hole was found.	70	Warning
Database access rules	The visible data access goes through Prisma (findUnique, updateMany with scoped WHERE clauses), and no string-built SQL or unscoped deletes appear in the excerpts. However, the schema, migrations and most services and controllers were not included in the digest, so index, foreign-key and cascade coverage and any raw queries could not be verified.	70	Warning
Code structure & duplication	The backend separates routes, controllers, services, lib and workers with a clear layering, and the frontend splits pages from components and lib helpers. The digest shows no god files or copy-pasted modules, though the auth controllers repeat cookie and token helpers that could be shared.	88	Pass
Build reproducibility	Each package has its own package.json and lockfile, and CI, Docker and render.yaml are all present, so a clean machine can probably install and build. However, a project file points three scripts at `a project file`, which does not appear in the tree. HowToSetup.md could not be reviewed in full, so step order and prerequisite versions are unconfirmed.	72	Warning

Open warnings

Problems that did not stop the listing. They stay on the product page until a later version fixes them.

Warning 1 **No real credentials found; demo password is published and .env.example uses weak JWT placeholders**

No live API keys, private keys or production connection strings were found. The regex hits are placeholders, CI test values or code that handles passwords. Two weak-default items remain: a published demo password for the live demo (documented in README and used in an export script), and `change-me-*` JWT secrets in .env.example that pass the [hidden] minimum, so a buyer could ship them unchanged.

Warning 2 **Prisma ORM used with parameterised queries; schema files not fully reviewable, so score is capped**

The visible data access goes through Prisma (findUnique, updateMany with scoped WHERE clauses), and no string-built SQL or unscoped deletes appear in the excerpts. However, the schema, migrations and most services and controllers were not included in the digest, so index, foreign-key and cascade coverage and any raw queries could not be verified.

Warning 3 **Auth primitives look sound, but most routes and ownership checks could not be traced**

The visible code hashes passwords with bcrypt, applies login lockout, and separates admin access from member accounts on the user type's isMemberType flag. The digest omits the route files (admin.js, membership.js, etc.) and the controllers behind them, so per-route guards and id-based ownership checks could not be verified. The score is capped for that reason, not because a hole was found.

Warning 4 **Mostly reproducible; one script target is missing and several setup gaps remain**

Each package has its own package.json and lockfile, and CI, Docker and render.yaml are all present, so a clean machine can probably install and build. However, a project file points three scripts at `a project file`, which does not appear in the tree. HowToSetup.md could not be reviewed in full, so step order and prerequisite versions are unconfirmed.

Requirement list

What the builder agreed to deliver before uploading — 17 of 28 met.

✓	Complete source for every part	Met
!	Schema creates from empty	Partial
!	HowToSetup.md with two targets	Partial
✓	No real credentials	Met
✓	Single example env file	Met
!	Lockfiles for both apps	Partial
!	Authorisation on every write route	Partial
!	Demo account on a live URL	Partial
✓	README with features and licence note (nice)	Met
✓	CLAUDE.md for AI tools (nice)	Met
!	CHANGELOG starting at 1.0.0 (nice)	Partial
✓	Seed data (nice)	Met
✓	Docker compose file (nice)	Met
!	Automated tests (nice)	Partial
!	Deployment and API docs (optional)	Partial
✓	README.md	Met
✓	HowToSetup.md	Met
✓	a project file	Met
✓	Express a project filee	Met
✓	Express a project file	Met
✓	Next.js a project file	Met
✓	CLAUDE.md (nice)	Met
✓	CHANGELOG.md (nice)	Met
✓	a project file (nice)	Met

✓	docker-compose.yml (nice)	Met
!	LICENSE-NOTE.md (optional)	Missing
!	a project file (optional)	Missing
!	a project file (optional)	Missing

PART 2

Human review

Reviewers from the Vibe96 team in Dubai worked through each question below; a final reviewer signed it off.

Stage 1 — Installed and run from the delivered code

Completed 13 Nov 2026

A reviewer installed the product on a clean machine, following only the guide that ships with it.

QUESTION	ANSWER	REVIEWER'S NOTE
Packages restored without errors	Yes	
Solution builds clean	Yes	
Database created from the shipped script or migrations	Yes	
First sign-in works with the documented steps	Yes	
Setup guide is accurate and complete	Yes	
Every module in the feature list opens and works	Yes	
No real secrets in the archive	Yes	
Branding and company details can be changed without code	Yes	

Stage 2 — Live demo compared with the delivered code

Completed 13 Nov 2026

A second reviewer checked that what the listing and demo show is what the buyer receives.

QUESTION	ANSWER	REVIEWER'S NOTE
Demo URL is reachable	Yes	
Demo credentials work	Yes	
Demo runs the same version as the archive	Yes	
All five differentiators are visible in the demo	Yes	
Screenshots match the demo	Yes	
Nothing in the demo is missing from the code	Yes	
Datasheet claims are accurate	Yes	

Changes asked for during review

None — approved on the first round.

Sign-off: approved for sale on 13 Nov 2026 with 4 warnings shown publicly.

What this report covers — and what it doesn't

- **It covers** version 1.0.0 exactly as the buyer downloads it: the source archive, the setup guide and the live demo on the dates above.

- **It is not** a penetration test, a performance or load test, or a legal review of third-party package licences.
- **Scores are a point in time.** Libraries age; a later version is audited again and gets its own report.
- **Your setup matters.** Hosting, configuration and changes made after purchase are outside this review.
- **How the score is made:** each AI check is scored 0–100 and weighted (security counts most). A listing needs 75 or more, no failing check, and the human review passed.
- **Always try the live demo** before buying, and ask the builder questions from the product page.
