

VIBE96 QUALITY REPORT

WorksheetWiz – AI Worksheet Generator for Teachers

AI worksheet generator for teachers and schools: printable worksheets with answer keys, Word export and a saved library.

Product ID	**B1260-97879**
Builder	**Mohammad Akbar Ali**
Version reviewed	**1.0.0 · released 26 Nov 2026**
Stack	**None: zero-dependency Node.js http module, vanilla HTML/CSS/JS front end · JavaScript (Node.js 18+ server, vanilla browser JS) · None: no database; saved worksheets live in each user's browser localStorage**
Built with	**Claude Code**
Review period	**18 Nov 2026 – 26 Nov 2026 · 1 round of changes**

89 / 100

Passed with 2 warnings

Pass mark 75 and no failing check.

At a glance

✓ Installed and run from the delivered code — 8 of 8 checks answered yes.

! Live demo compared with the delivered code — 6 of 7 checks answered yes.

! 17 of 21 promised items delivered (setup guide, example config and the rest).

✓ Security scored 90/100 with no failing check.

! 2 open warnings — explained in part 1.

Check this report is genuine. Scan the code or open vibe96.com/report/QR-26-00154. The online copy always shows the latest status.

PART 1

AI code audit

The full source archive was read by our AI auditor against each check. It reads the code — it does not run it; running it is part 2.

CHECK	WHAT WE FOUND	SCORE	RESULT
Secrets & credentials	Every secret-scan candidate is a placeholder (sk-ant-..., your-anthropic-api-key-here, choose-a-strong-password) or code reading from environment variables. No .env file is committed, and keys are never sent to the browser. APP_PASSWORD defaults to empty, so the app ships unlocked by default, which is a minor note rather than a leaked secret.	97	Pass
Dependency vulnerabilities	package.json declares empty dependencies and devDependencies, and the server uses only Node built-ins, so there is no third-party package that could carry a known vulnerability. A lockfile is not required because nothing is installed. The only small concerns are a floating Docker base image tag and an external analytics script option.	96	Pass
Authorisation & access control	The server exposes GET /api/config, POST /api/generate and static files; there are no user accounts, stored records, admin routes or id lookups, so ownership and role checks do not apply. The one guard (APP_PASSWORD) is off by default, so the paid AI endpoint is open to anyone unless the owner sets it, with only a per-IP rate limit protecting the API bill.	72	Warning
Database access rules	WorksheetWiz is a zero-dependency Node.js server with no database. Saved worksheets live in each user's browser localStorage, so there are no SQL statements, query builders, schema files or migrations to audit. No injection path or unscoped destructive statement exists.	100	Pass
Code structure & duplication	The server is split into focused modules (config, prompt, providers, security) and the front end into util, render, export, library and app. The code is small and readable, and the main concern is a few hard-coded values and a controller that is growing. Nothing here would make the product hard to maintain today.	88	Pass
Build reproducibility	The app has no npm dependencies and no build step, so a clean machine with Node 18+ can run `node server.js`. The Docker setup is coherent but has small gaps: no .dockerignore, and docker-compose fails if the .env file has not been created. HowToSetup.md was only partly visible, so version and prerequisite statements could not be fully verified.	82	Warning

Open warnings

Problems that did not stop the listing. They stay on the product page until a later version fixes them.

Warning 1 **Zero-dependency Node app is reproducible; minor Docker and setup-doc gaps remain**

The app has no npm dependencies and no build step, so a clean machine with Node 18+ can run `node server.js`. The Docker setup is coherent but has small gaps: no .dockerignore, and docker-compose fails if the .env file has not been created. HowToSetup.md was only partly visible, so version and prerequisite statements could not be fully verified.

Warning 2 **Only 3 routes; password lock is optional and weak, but no per-user data or admin routes exist**

The server exposes GET /api/config, POST /api/generate and static files; there are no user accounts, stored records, admin routes or id lookups, so ownership and role checks do not apply. The one guard (APP_PASSWORD) is off by default, so the paid AI endpoint is open to anyone unless the owner sets it, with only a per-IP rate limit protecting the API bill.

Requirement list

What the builder agreed to deliver before uploading — 17 of 21 met.

!	Complete source of every part	Partial
✓	No real credentials	Met
!	HowToSetup.md with at least two targets	Partial
✓	Zero-dependency build reproducibility	Met
✓	Demo account and live URL	Met
!	Access control on generation and library	Partial
✓	Five differentiating features exist in code	Met
✓	README.md with screenshots and licence note	Met
✓	CLAUDE.md or AGENTS.md for AI tools (nice)	Met
!	CHANGELOG.md starting at 1.0.0 (nice)	Partial
✓	Keep files small and layered (nice)	Met
✓	Example worksheets or tests (optional)	Met
✓	docs folder (optional)	Met
✓	README.md	Met
✓	HowToSetup.md	Met
✓	Worksheet a project filee	Met
✓	Worksheet a project file	Met
✓	CLAUDE.md (nice)	Met
✓	CHANGELOG.md (nice)	Met
✓	LICENSE-NOTE.md	Met
✓	docker-compose.yml (nice)	Met

PART 2

Human review

Reviewers from the Vibe96 team in Dubai worked through each question below; a final reviewer signed it off.

Stage 1 — Installed and run from the delivered code

Completed 25 Nov 2026

A reviewer installed the product on a clean machine, following only the guide that ships with it.

QUESTION	ANSWER	REVIEWER'S NOTE
Packages restored without errors	Yes	
Solution builds clean	Yes	
Database created from the shipped script or migrations	Yes	
First sign-in works with the documented steps	Yes	
Setup guide is accurate and complete	Yes	
Every module in the feature list opens and works	Yes	
No real secrets in the archive	Yes	
Branding and company details can be changed without code	Yes	

Stage 2 — Live demo compared with the delivered code

Completed 26 Nov 2026

A second reviewer checked that what the listing and demo show is what the buyer receives.

QUESTION	ANSWER	REVIEWER'S NOTE
Demo URL is reachable	Yes	
Demo credentials work	No	
Demo runs the same version as the archive	Yes	
All five differentiators are visible in the demo	Yes	
Screenshots match the demo	Yes	
Nothing in the demo is missing from the code	Yes	
Datasheet claims are accurate	Yes	

Changes asked for during review

None — approved on the first round.

Sign-off: approved for sale on 26 Nov 2026 with 2 warnings shown publicly.

What this report covers — and what it doesn't

- **It covers** version 1.0.0 exactly as the buyer downloads it: the source archive, the setup guide and the live demo on the dates above.

- **It is not** a penetration test, a performance or load test, or a legal review of third-party package licences.
- **Scores are a point in time.** Libraries age; a later version is audited again and gets its own report.
- **Your setup matters.** Hosting, configuration and changes made after purchase are outside this review.
- **How the score is made:** each AI check is scored 0–100 and weighted (security counts most). A listing needs 75 or more, no failing check, and the human review passed.
- **Always try the live demo** before buying, and ask the builder questions from the product page.
